The Federal Communications Commission is considering taking actions that will restrict consumer choice by deregulating local phone service.

Millions of Americans like me could have their phone service threatened if the local phone companies aren't required to allow competitors access to the market. I'm also concerned about the Commission's move to relieve all broadband Internet access facilities of open access obligations.

Both of these key decisions will limit my choices as a consumer by lessening competition, diminishing cost savings and threatening consumer protections. As a constituent, I urge you to support competition and open access for local phone service.

Sincerely,

Charles & Billie Toalson

I believe that too many regulations protect the existing companies, rather than allowing competition in a free marketplace. Many communications services are still overpriced and additional competition should drive down prices.

Sincerely,

Hank Hoffman

Both of these key decisions will limit my choices as a consumer by lessening competition, diminishing cost savings and threatening consumer protections. As a constituent, I urge you to support competition and open access for local phone service. Deregulation since the break-up of "Ma Bell" has been a disaster for the consumer. We now have 2 separate bills-long distance and local- the sum total of which is drastically higher than before. Look how many times my cable provider has changed hands in the last 4 years- first it was Continental Cablevision, then Media One, then **ATT** Broadband, now it is becoming Comcast! I rest my case...

Sincerely,

Clifford J. Mead

The Federal Communications Commission is considering taking actions that will restrict consumer choice by deregulating local phone service.

I am particularly concerned by the deregulation of the industry while promoting monopolies through regulations and industry purchased laws. Clearly the Republican agenda has removed balance and any sense of fairness at the FCC.

Millions of Americans like me could have their phone service threatened if the local phone companies aren't required to allow competitors access to the market. I'm also concerned about the Commission's move to relieve all broadband Internet access facilities of open access obligations.
